EUROPE'S PREMIER WINTER RACING SERIES

BIGGER AND BETTER THAN EVER IN 2027

The GEDLICH Racing Winter Series delivers the very best racing at the most beautiful locations in Europe. No other region on earth offers such a high density of FIA-grade race tracks with outstanding weather safety. Across six race weekends, three Winter Series championships offer superb action.

Thanks to a professional-yet-relaxed atmosphere, amateur drivers, superstars and young aspiring talents all find a comfortable space in the Winter Series paddock.

*The **GT Winter Series** is where it all started for the GEDLICH Racing Winter Series, and continues to blaze a trail in 'off-season' racing. 2027 marks the eighth season, and the fastest and most extreme GT racing machinery will once again compete head-to-head across three fast-paced races per weekend at five prestigious venues.*

*Now entering its fourth season, the **GT4 Winter Series** is a perfect platform for aspiring factory GT racing stars to put a spotlight on their talent, alongside ambitious amateurs. The cars of the GT and GT4 Winter Series - alongside high-performance touring cars - are also eligible for the second edition of the **6h of Portimão**, a standalone endurance event at the Autódromo Internacional do Algarve.*

*The **Formula Winter Series** has matured into one of the most useful tools for European-based Formula 4 competitors, and continues to be an ideal launching pad for drivers looking to compete and learn before the summer racing season. A new tournament format for 2027 will allow for the most diverse, international and compelling grids in the history of FWS.*

A CAREFUL SELECTION OF IBERIA'S FINEST FACILITIES; THE BEST WINTER CALENDAR OF ALL

As an organisation founded by and for passionate racers, GEDLICH Racing always works to ensure that the Winter Series calendar offers the very best circuits available. And, while the track itself is always the first consideration, the 'GEDLICH approach' goes much further.

Our calendar of globally renowned facilities is chosen based not just on engagement for those behind the wheel, but also on important matters such as paddock space, modern garages and great circuit staff.

The calendar is constructed to optimise travel plans. Starting in Portugal, then on to southern Spain before heading east for the final two events. This allows teams to create a logical journey through the Winter Series season.

Whether you're starting off your 2027 in the Winter Series ahead of a summer programme, or focusing your year's racing efforts on our events, the selection of circuits in our compact schedule will suit your needs.

Power is nothing without control - Pirelli exclusively supplies GT and Formula tyres for the Winter Series

Pirelli is one of the world's leading tyre manufacturers for both the road and the race circuit. With over 150 years of history, the Italian firm has a celebrated past of performance and innovation.

Innovative technology often finds its home on the racing circuit, and this has been the case for Pirelli throughout the company's existence. As an example, radial tyres were in their infancy during the 1970s, and were characterised by a narrow build and thus a smaller contact patch with the road. If you wanted a wider tyre for improved traction, the only option was cross-ply construction. The factory Lancia rally team wanted to use radial tyres, but required a wider contact patch to get the car's power

down to the ground efficiently. This resulted in a collaboration with Pirelli for the 1975 season, in which Lancia secured the World Rally Championship.

The P-Zero family of tyres is in exclusive use within the Winter Series by Gedlich Racing. The collaboration allows GEDLICH Racing's events to offer the same tyres that teams compete with in a majority of the world's premiere GT and F4 competitions.

Beyond our paddock, Pirelli rubber is the exclusive supplier of tyres for Formula 1, Formula 2 and Formula 3, the global portfolio of GT World Challenge events, plus the World Superbike Championship.

DSRM - Essential racing equipment and apparel on-supply for teams and drivers at the GEDLICH Racing Winter Series

It is well known that you need special equipment for racing. This is not only true for the driver, but also for the vehicle and the teams that work to get the car on-track.

Barcelona-based Winter Series partner DSRM cover the entire spectrum. Drivers and teams can not only find helmets, gloves, suits or underwear, but also radio and communication equipment or individual solutions.

Teams use DSRM's wide range of technology from the jack to specialist tools. "We have some things permanently at our stand," says Eduard Olle of DSRM. "Also, teams and drivers can pre-order items from us and we will bring them to the next race. With the concentrated Winter Series calendar, the wait is short in any case."

You will find DSRM's booth in a prominent location in the paddock at every Winter Series event.

QF-LDA Racing & Performance - Bringing grip to the circuit

As a long-time partner of the GEDLICH organisation and Winter Series, QF-LDA is a familiar presence in our paddock.

As the Portuguese distributor of Pirelli, QF-LDA is a critical partner, providing support for those using Pirelli tyres at all of our events. Tyre services for the inaugural seasons of both the GT4 Winter Series and Formula Winter Series were co-ordinated by QF-LDA, and they will once again be providing support on behalf of Pirelli in 2027.

However, that is merely the tip of the iceberg for the company's services in the Iberian region.

Beyond distribution for Pirelli, QF-LDA is also partnered with top motorsport brands including Sparco, Sabelt, OZ Racing Wheels, Stilo, Alpinestars, Bell Helmets, PFC Brakes, Gulf Oils and Eibach. A range of their products will also be available to all in the Winter Series paddock.

QF-LDA is keen to work with our teams and drivers once again this winter!

The importance of parity - BoP control and scrutineering

The Winter Series organisers know the importance of a solid regulatory framework when organising events for modern racecars - from junior racers to GTs, fairness and parity is key.

For the 2027 season, the regulations and scrutineering process have been further optimised to enable even better racing across all of our championships. An advanced inspection area featuring elite personnel, top of the line scales and measuring equipment will be present at all 2027 Winter Series events, ensuring compliance and fairness across the paddock.

Compliance with the "Balance of Performance" will be strictly monitored by technical commissioners and external service providers. For the GT cars, the BoPs will be provided by our licensing partner SRO.

Delicious catering awaits at Mic Food

Mic Food joined the Winter Series paddock in 2024, and immediately became a favourite new addition for the teams and personnel that frequented the hospitality unit.

A family-run business that has operated since 2007, Mic Food has a stellar reputation for motorsport event catering. Every meal at Mic Food brings new, fresh offerings, as well as staple dishes that will become your favourites across the GEDLICH Winter Series season. An efficient team of chefs, cooks and kitchen staff supplying a large seating area means that – even at peak times – you will receive excellent service and plenty of options.

Whether you want a full three-course meal, a snack, or an authentic Italian coffee, Andrea and the team at Mic Food have you covered.

GET YOUR RACING LICENCE

Take the first steps – Racing licence and entry into motorsport in one!

Those who are in a particular "hurry" to get started in motorsport are in the right place at the Winter Series. For example, it is possible to complete a course to obtain the national A licence on-site, shortly before a Winter Series event.

Thanks to the particularly quick reaction of the German Motorsport Federation (DMSB), the coveted licence is issued electronically immediately after the course, entitling the licence holder to start races instantly.

This means that you can take part in three Winter Series races on the same weekend, gaining experience, results and championship points! It couldn't be quicker to get started in motorsport.

Get more information: jann@gedlich-racing.com

RACE^G TEST

PROFESSIONAL, EXCLUSIVE AND BESPOKE – THE BEST WAY TO PREPARE

Testing is a high-stakes endeavour for any racing team. Every extra minute of track time you can get is vital to finding success on a racing weekend, and doing that in the most professional setting available ensures the best results.

A Race Test by GEDLICH Racing is a different proposition than a regular open track session. Only professional teams are permitted, in strictly limited numbers. Street cars and entry-level racing cars are strictly forbidden, meaning that only bespoke machinery will be on-track.

For the annual calendar of race tests, GEDLICH Racing is careful to select venues that are relevant to our clientele, and considered to be only the most elite FIA graded facilities in Europe. Whether you are looking for test events during the winter months, or in-season testing during the summer, the Race Test is the perfect occasion for drivers and engineers to master a circuit.

Both timekeeping and a safety package are included, allowing teams both race event-style information on lap time, and peace of mind in the event of a problem or incident.

Top teams from a majority of Europe's premiere racing series already use GEDLICH Race Tests to find an advantage; join us to find your limits in a professional, organised environment!

TEAM + DRIVER CLASSIFICATION 2026

A fabulous season with incredible competition

Leading teams from every corner of Europe featured on the GTWS entry lists, and the variety of cars, categories and driver backgrounds added a great deal to a spectacular 2026 tour. GEDLICH Racing welcomed a high number of full-season entrants, as the value of winning in the Winter Series increases year-on-year.

As the 2026 campaign ended, excitement was already high among teams to reconvene in January 2027 for the new season.

The entire team at GEDLICH is excited to welcome back our 2026 frontrunners, as well as new competitors that will add even more depth to the 2027 grid!

THE GT4 WINTER SERIES SET TO THRILL IN SEASON FOUR!

The fourth season of the SRO-licensed GT4 Winter Series will once again be a show-stealer on the GEDLICH Racing Winter Series package

The high-level of GT4 racing across the continent is evident in the summer, and in the Winter Series, the best teams from across Europe converge on one grid.

For season four, the GT4 Winter Series will be held across five events at the Iberian region's finest racing facilities. Each event's competitive running is split across two 30-minute sprints and a 60-minute pitstop race.

Driver categorisation determines the class you are entered into; AM for all-Bronze line-ups, PRO-AM for line-ups featuring one bronze driver alongside a driver graded silver or above, and PRO for all-silver or silver/gold driver combinations. Points are scored within your class, as well as in an overall championship classification.

The GT4 Winter Series is an officially SRO licensed racing series

CHOOSE YOUR CLASS!

The GT4 Winter Series offers professional racing for all GT4 cars

Drivers from all backgrounds are equally important to the GT4 Winter Series concept. This is why our series organisers ensure a class structure where all of our competitors can compete against drivers of a similar performance level, regardless of whether racing is a hobby or a career.

Facts

- + **Pirelli tires mandatory, amount of tires limited to help control budgets**
- + **GT4 homologated cars with BoP, plus separate categories for Porsche Cayman GT4 CS and out-of-homologation GT4 machines**

IMPRESSIONS GT4 WINTER SERIES 2026

TEAM + DRIVER CLASSIFICATION 2026

A fantastic third GT4WS season!

The GT4 Winter Series proved to be a resounding success once more, with strong grids, close competition and great battles throughout the class standings.

The Club and Cayman Trophy class once again added depth and intrigue to the grids, alongside the current-generation GT4 machinery in PRO, PRO-AM and AM. Across all classes, there were close runs to the chequered flag, highlighting the overall quality of the field."

The 2027 GT4 Winter Series is likely to be yet another step forward for this popular grid, with even greater multi-national interest and more marques set to be represented. New front-running teams look set to challenge the established front-runners in season four!

We look forward to welcoming new teams and returning faces for what should be a thrilling 2027 in the SRO-licensed GT4 Winter Series!

FEB 2027

6h of PORTIMÃO

GEDLICH Racing's 6h of Portimão delivers the perfect stage for GT teams who thrive on endurance competitions. 2025 marked the first true endurance races held by GEDLICH Racing, and after fantastic growth in 2026, the 6h of Portimão returns for 2027.

ROUND THREE FOR THE 6H OF PORTIMÃO

THE UNPARALLELED THRILL AND CHALLENGE OF ENDURANCE

This six-hour event is designed to be a cost-effective, competitive platform for the most experienced and successful endurance teams and drivers, as well as newcomers to longer-distance racing. The event's careful eligibility criteria is focused on the fastest cars in premiere-level GT championships. GT2, GT3 and GT4 machines are all eligible, alongside single-make GT machinery and the very fastest touring cars, ensuring minimised closing speed risks.

As with many other GEDLICH Racing projects, the 6h of Portimão will have overall victors and class winners, ensuring that all classes have trophies and glory to fight for.

Qualifying sessions for the race will take place on Friday, while the 6H race itself will be the focus of Saturday.

The timetable will be planned to allow for racing into the sunset, completing a quintessential endurance racing experience for our competitors. In addition to the main event, support races from other GEDLICH Racing categories ensure a 'big' feel to both weekends.

The sign-up fee is € 7,000 net for the three-day race event, with pit space included.

The 6h of Portimao is not part of the GTWS or GT4WS championships.

27

4-6h of PORTIMÃO

FEB 2027

THE CLASS FORMAT FOR THE 6H OF PORTIMÃO

GT3 cars will be permitted in the top class, with a bevy of additional classes for GT2 machinery, as well as the fastest single-make GT racing cars from Porsche, Lamborghini and Ferrari. GT4 cars and the ever-popular Porsche Cayman GT4 CS will also be permitted.

Class	Permitted Vehicles
GT2	Cars with GT2 homologation
GT3	Cars with GT3 homologation
GT4	Cars with GT4 homologation
Cup 1	Ferrari Challenge
Cup 2	Porsche Cup 992
Cup 3	McLaren Artura Trohpy
Cup 4	Lamborghini Super Trofeo
Cup 5	Cayman Trophy

In addition to the classes detailed above, catch-all GTX and TCX classes will also feature on the grid.

FORMULA WINTER SERIES

2026

TEAM + DRIVER CLASSIFICATION 2026

Resounding title-winning performances from Rodin Motorsport and DVL

The 2026 Formula Winter Series wrote new chapters into the history books of the category. Rodin Motorsport's Dries Van Langendonck became the first Rookie class competitor to win the overall title, and was able to secure the accolade before the final round of the season. Van Langendonck's performances - as well as the efforts of his teammates Ethan Lennon and Alfie Slater - also secured the UK-based Rodin squad the teams' title.

46 drivers competed in the 2026 season, and this will serve as an indicator of things to come. A new format for 2027 is set to add greater capacity and a more comprehensive spread of Europe's top teams going forward.

GEDLICH Racing is excited to welcome more talented stars to the grid, as well as familiar teams and debutants, for 2027.
